

KASTURI RAJEEV

Senior Java Developer — Spring Boot, Microservices, DevOps & Cloud Engineering (AWS/Azure)

Vijayawada, India | +91 7702580934 | kasturirajeev90@gmail.com

PROFILE SUMMARY

- 9+ years of experience building backend systems in Java/J2EE, Spring, Spring Boot, and Microservices, with front-end experience in Angular 8 and React JS
- Hands-on with DevOps practices for cloud applications, deploying and operating systems on AWS and Azure
- Delivered production backend APIs and microservices for Fortune-500 healthcare and banking clients across the US and Germany, in teams ranging from 6 to 100 engineers
- Certified DevOps Practitioner (Simplilearn); currently pursuing an Advanced Certificate Program in Cloud Computing
- Full SDLC ownership — requirement analysis, design, coding, testing, CI/CD deployment, and post-production support
- Experienced in Software Configuration Management (SCM), Agile/Scrum and Waterfall methodologies, and cross-functional coordination with QA, Release Engineering, and client teams

TECHNICAL SKILLS

Languages: Java, J2EE, Python, Scala

Frameworks: Spring, Spring Boot, Hibernate, EJB 3.0, Struts 1.3, Angular 8, React JS

Cloud & DevOps: AWS, Azure, Azure APIM, Docker, Jenkins, CI/CD, Pivotal Cloud Foundry (PCF), Power Automate

Data & Messaging: Cassandra, DataStax, Redis, JMS

Tools & Practices: Git, Maven, Ant, Jira, ServiceNow, Swagger, SonarQube, Agile/Scrum, Waterfall

WORK EXPERIENCE

Tata Consultancy Services — IT Analyst *Dec 2020 – Present*

MetLife Insurance (US Client, Healthcare) | Jun 2024 – Present | Team of 30

- Design and build Spring Boot microservices and React JS interfaces integrated with Azure APIM for MetLife's US healthcare platform
- Built onboarding automation using Power Automate and Azure Boards, streamlining coordination across a 30-person cross-functional team

McKesson Healthcare (US Client) | Jan 2023 – Apr 2024 | Team of 30

- Developed and maintained Spring Boot microservices for McKesson's healthcare platform, owning production support and monitoring through ServiceNow
- Partnered with release engineering to triage and resolve production incidents, improving turnaround on client-reported issues

HCSC Healthcare (US Client) | Sep 2021 – Dec 2022 | Team of 50

- Built Spring Boot microservices deployed on Pivotal Cloud Foundry (PCF), documenting REST APIs with Swagger for cross-team consumption
- Collaborated within a 50-engineer delivery team supporting HCSC's healthcare platform end to end

DaVita Healthcare (US Client) | Dec 2020 – Aug 2021 | Team of 100

- Developed Spring Boot microservices integrated with Redis and Cassandra/DataStax, supporting DaVita's healthcare platform within a 100-person delivery organization
- Containerized services with Docker and built Jenkins CI/CD pipelines, standardizing automated testing and deployment across environments

Altran — Senior Software Engineer *Sep 2020 – Dec 2020*

- Supported a Network Management System (NMS) on the Mosaic Cloud Platform, contributing Python and Scala scripts for platform features

- Managed Git-based version control, resolved build failures, and automated code deployment using Jenkins; tracked work in Jira

CGI Group — Senior Software Engineer *Dec 2019 – Sep 2020*

- Developed the CACS Banking Platform (Team of 50) using Core Java, Dojo, and RESTful web services, including online and offline batch processing
- Owned UI development and integration testing across intermediate and final deployment stages; authored functional specifications and low-level design documents

Cognizant Technology Solutions — Full Stack Developer *Jun 2019 – Dec 2019*

- Built the AKASH IIT-JEE platform (Team of 13) using Angular 8, Spring Boot, Microservices, and Hibernate 4.0, containerized with Docker and integrated into Jenkins CI/CD
- Generated unit test coverage and code quality reports using SonarQube; optimized I/O performance and provided post-production support

HCL Technologies — Cloud & DevOps Engineer, Deutsche Bank (Frankfurt) *Dec 2014 – May 2019*

- Developed Admin Tool, Cost Transparency, Inducement, and Securities Tool Box applications (teams of 6–7) using Core Java, Struts 1.3, EJB 3.0, JMS, and J2EE web services
- Managed AWS-deployed application performance; installed and configured Jenkins CI on Linux to automate builds
- Set up backup and recovery workflows using AWS Snapshots; established Git repositories and branching strategy for client teams

EDUCATION

- B.Tech, Information Technology — Amrita Sai Institute of Science & Technology, JNTUK University, Kakinada (2014)

CERTIFICATIONS

- DevOps Practitioner Training — Simplilearn
- Advanced Certificate Program in Cloud Computing — In Progress
